

TASK	Server location		EXPECTED RESULTS	karthik16 (32GB, 1 TB)	BBB(512 MB, 4 GB)	PocketBeagle(512 MB, External memory card)	
Stage 1: On same system							
CRUD (Simple)	localhost			Crashed after 196th iteration	Similar but crashed much before		Crashed : Had to purge and reinstall mongodb
CRUD(ORM)	localhost			Slower compared to previous but almost similar behaviour	Similar behaviour as karthik16		Crashed earlier than simple CRUD
GridFS	localhost			Faster than previous, uses serialize read and writes			
				Crashed after 76th iteration which means $75 \times 76 = 5700$ writes			
Stage 2: Different system of low, high and same configs							
Stage 3: Different network of low, high and same configs
